Convenient... Reliable... Effective!
North American Arms manufactures a unique family of small caliber, small frame size firearms which are intended primarily for concealed carry and personal protection. Purposefully designed and popularly considered as “Convenient, Reliable, Effective”, they are:

- **Convenient** - because of their small size and light weight, NAA firearms are easy to carry and conceal everywhere (legally permissible), every day. Along with their wallet and keys, many of our customers “don’t leave home without one”.

- **Reliable** - made in America from the finest grades of stainless steel, NAA firearms are engineered and manufactured to exacting tolerances. With functioning popularly described as “flawless”, all NAA products are supported by a lifetime warranty.

- **Effective** - while not the ballistic equivalent of a .45 ACP, 22 rimfire (and .32 / .380 ACP) bullets are unarguably lethal at self-defense ranges. In the face of a violent confrontation, any gun is better than no gun, and simply brandishing a weapon frequently diffuses a potential threat.

In addition to self defense, NAA products are popular choices for law enforcement as easily concealable backups. Recreational customers appreciate their light weight and portability in backpacks and tackle boxes. Women and new shooters are comfortable with their simple and intuitive operation. Collectors admire their craftsmanship and classic designs, and casual shooters simply enjoy low-cost plinking.

NAA products enjoy a flattering reputation, built after almost 40 years, of high quality and affordability, supported by a customer service team second to none.

You know you want one - what’s your reason?

**SELF DEFENSE STATISTICS...**

644,967 handguns are used annually for self-defense in America - or roughly once every 48 seconds.

The “Guardian” series is a family of 6+1 double-action-only (DAO) semi-automatics pistols. Manufactured on an ergonomically-designed frame of 17-4 stainless steel, these guns promise to deliver a lifetime of Timex-like rugged, reliable performance over 1000s of rounds.

The large frame model is chambered in 380 ACP, while the small frame is chambered in 32 ACP. Additionally, each frame can be chambered in 32 NAA (a 380 bottle-neck cartridge); the smaller frame can be chambered in 25 NAA (a 32 bottle-neck cartridge).

The “Guardian” 32 NAA is identical to the 380 frame, yet is chambered in a proprietary 32 NAA (a 380 bottle-neck cartridge).
The “Guardian” 32 ACP is a smaller frame chambered in 32 ACP. With a straight-blowback operation, second strike capability and no external safeties to snag clothing or interfere with split-second functionality, “Guardian” pistols are the quintessential personal protection pocket pistols.

The “Guardian” 25 NAA is identical to the 32 ACP frame, yet is chambered in a proprietary 25 NAA (a 32 bottle-neck cartridge). Developed with the guidance of world-recognized ballistics expert Ed Sanow and in cooperation with high-performance ammunition specialists COR®BON, these bottle-neck cartridges deliver extraordinary ballistic performance, propelling bullets in excess of 1,200 f.p.s. from barrels less than 2.5” in length.
The original line of NAA-designed birds-head gripped, 5-shot single-action revolvers is the most successful family of mini-revolvers ever manufactured. Highlighted by the ultra-small 22S, each of these is the smallest functioning revolver of its caliber in production, allowing for maximum concealability.

Frequently characterized as “watch-like” to describe the precision in engineering and manufacturing as well as the quality of craftsmanship, NAA mini-revolvers address a wide variety of markets and applications. Each can be tailored to meet your particular needs, tastes and interests with a wide selection of grips, holsters, sights and novel carry options.

NAA firearms are designed for people who respect the adage “it’s better to have a small gun on your person than a large gun at home / in the car / etc”.
The NAA “Holster Grip” is one of the most innovative gun/grip configurations in the firearms industry. Available for both Magnum and Long Rifle frame size mini-revolvers, the rugged plastic sheath (with ambidextrous clip) folds knife-like against the bottom of the gun, creating a great variety of additional concealed opportunities/modes. When positively locked open, the “Holster Grip” provides a full-sized gripping surface for comfortable, secure handling and more positive recoil control. The grip is available also as an aftermarket accessory.
The runt of the litter, the recently introduced “PUG” is a stocky companion with remarkable balance that delivers a bite even worse than its bark. The “PUG” has a softer, pebble-textured grip enabling the handler to keep a firm leash on this pocket-sized puppy. The XS target system (tritium optional) provides a quick sight picture to allow the handler to direct the bite. Squat and sturdy, the “PUG” pedigree is pure North American Arms.

**Survey Statistics...**

“The National Crime Survey estimates that eighty three percent of Americans will be victims of a violent crime in their lives.”

The “Mini-Master” family is a group of magnum framed mini-revolvers which sport a heavier, vented barrel and a bull (non fluted) cylinder. The 4-inch barrel “Mini-Master” and 2-inch barrel “Black Widow” models have oversized rubber grips and either low profile or adjustable Millet sights, which makes these guns great “plinkers”.

FIREARM STATISTICS...
“Americans use firearms for protection an estimated one million times each year.”

The NAA "Earl", with its *faux* loading lever, is an 1860-style mini-revolver designed to resemble a 150 year old percussion piece then popular in the Old West. With its heavy octagonal barrel, top strap channel and bead front sight, the "Earl" could become your favorite plinker (pray for the snake, rodent or tin can that dares cross your path!). With available flap holster of belt-grade leather, strap on the "Earl" for an imaginative trip to a simpler time.
The NAA “Companion” is a 5-shot percussion (cap & ball) mini-revolver. Engineered by the legendary gun designer Dick Casull, the “Companion” can be complimented with most NAA grip and holster accessories. The “Companion” comes complete with loading tools, nipples and a small supply of bullets, and uses standard black powder and #11 percussion caps. Considered an antique replica and disabled from firing cartridge ammunition, the “Companion” is exempt from most provisions of the Federal Gun Control Act.
The Guardian Accessories allow you to custom design the way your gun can look, feel and carry.

FINISHES
*CS32/CS380-HPSB: High polished, slide and barrel only.
*CS32/CS380-HPA: High polished, appointment only.

CARRY PACKAGE
CS32/CS380-CP: Melt Down / De Horned, rounded smooth edges for comfortable pocket carry.

SIGHTS
(High Polish & Carry Package not available with sights)
S32/S380-ASHBT: XS sight, big dot, Tritium.
*S32/S380-ASHB: XS sight, big dot, white.
S32/S380-ASHST: XS sight, standard dot, Tritium.
*S32/S380-ASHS: XS sight, standard dot, white.
**S32/S380-GS: Gutter Snipe, green 3 dot Tritium, smooth design.
S32/S380-NKT: Novak sight, 3 dot Tritium.
*S32/S380-NKWD: Novak sight, white 3-dot.

MACHINING
CS32/CS380-FSF: Stippling, front of magazine well.
CS32/CS380-FSB: Stippling, back of magazine well.
CS32/CS380-FST: Stippling, front of trigger guard.
CS32/CS380-FSP: Stippling package, (includes all three).

SLIDES
CS32/CS380-SFS: Forward slide serrations.
CS32/CS380-SCL: Scalloped slide serrations.

GRIPS
G32/G380-KGW: Kingwood, smooth contoured.
G32/G380-CBW: Coco Bolo wood, smooth contoured.
G32/G380-GAW: Goncalo Alves wood, smooth contoured.
G32/G380-KGW-C: Kingwood, checkered.
G32/G380-CBW-C: Coco Bolo wood, checkered.
G32/G380-GAW-C: Goncalo Alves wood, checkered.
G32/G380-PFW-C: Pau Ferro wood, checked.
G32/G380-MPB: Black simulated pearl.

**RUG-N:** Rug, 9" black nylon.

**RUG-F:** Rug, 6-1/2".

*(Items not shown)*

*(L/R - specify left or right hand)*
North American Arms mini-revolvers are equipped with Safety Cylinders which include notches milled between the chambers. When the blade of the hammer is securely lowered into one of these notches, the handler enjoys both full 5-shot capacity and maximum protection against accidental discharges. When the hammer is cocked, the cylinder automatically rotates into battery.

The traditional half-cock position is a (un)loading aid only and does NOT constitute a safety. NAA mini-revolvers should NEVER be carried with the hammer over the rim of a live cartridge.

All NAA firearms enjoy a Lifetime Warranty. Older NAA mini-revolvers can have a Safety Cylinder factory-installed free of charge. Please contact NAA Customer Service at 1-800-821-5783 for further details.
